For our R&D department, we are seeking a committed, independent, and initiative personality as

Development Engineer “Monomere Recycling” (m/f/d)

Your field of activity

- Lead development project in the field of PET monomer recycling
- Establish fundamentals of PET monomer recycling and support knowledge transfer to plant engineering
- Develop and maintain the contact to main PET producers, recyclers and other stakeholders
- Coordinate the collaboration with research and technology institutions
- Represent POLYMETRIX in the relevant industry organizations and conferences

Your profile

- Degree in chemistry (Uni/FH), chemical engineering, plastics technology or mechanical engineering
- Profound knowledge in polymerization and depolymerization.
- Experience in leading industrial development projects
- Ability to develop basic principles and documentation and to implement them in simulations
- Very good oral and written English skills

We offer you a responsible, diversified role in an international and interesting work environment and the opportunity to contribute significantly to the success of our business.

Interested? Then please don't hesitate to send us your complete application to:
